PROFESSIONAL SUMMARY

AI and Automation Developer with over 3 years of experience leading the full lifecycle of solutions: design, development and deployment of autonomous agents and complex production automations using Python, Java and n8n. End-to-end owner of projects for multiple clients, from requirements gathering to delivery and maintenance, including agents with RAG systems and vector databases (Supabase, Pinecone).

TECHNICAL SKILLS

Languages & Frameworks: Python, Java

AI & Automation: n8n, AI Agent Development, API Integration, Process Automation, LLM, RAG, NLP

Tools: Git, CRM

EXPERIENCE

Web, AI and Automation Developer | Freelance (Multiple SMB clients)

2023 - Present

– Since 2023, I design and build full-stack websites for local businesses (HTML5, CSS3, JavaScript, SEO, WhatsApp integration), and more complex applications with Next.js, TypeScript and Supabase/PostgreSQL.

– Since 2024, I lead the end-to-end design, development and deployment of autonomous AI agents to automate complex business processes, using Python and Java.

– I architect and implement automation workflows in n8n integrated with external APIs, CRMs and data pipelines for multiple simultaneous clients.

– I design AI agents with RAG systems and vector databases (Supabase, Pinecone) to give them memory and context over each client's data.

Tech stack: Python, Java, n8n, REST APIs, LLM, RAG, Supabase, Pinecone, Redis, PostgreSQL, Next.js, TypeScript, HTML, CSS, Tailwind CSS

CRM Lead | IITOOLS

August 2024 - 2025

– Designed and built the sales team's CRM processes from scratch, improving lead follow-up.

– Recruited and provided technical onboarding for the sales and operations team, implementing automated commercial communication workflows.

Tech stack: CRM, Process Automation

FEATURED PROJECTS

Expert Agent 360

Designed and implemented "Agente Experto 360," an AI-powered WhatsApp agent for a beauty salon, fully automating customer support, bookings and reminders. Built proactive retention flows using n8n and Meta's WhatsApp API, running automated win-back campaigns for inactive customers. Integrated RAG capabilities and personalized memory with Pinecone and Supabase, enabling the AI to drive revenue through cross-selling and upselling strategies based on customer history. It also generates a monthly dashboard summarizing the relevant data collected by the agent (interactions, bookings, recovered customers) to support business growth decisions.

Tech stack: n8n, WhatsApp Business API, RAG, Pinecone, Supabase

EDUCATION

B.Eng. in Information Technology and Digital Business — Universidad Anahuac Queretaro (2024 - 2029 (in progress))

Focus: AI, Automation and Data Analytics

High School Diploma — Tecnologico de Monterrey, Queretaro (2024 (graduated))

International exchange semester, Quebec, Canada
